Juergen,

Item 15-96 duplicates a Legacy item (19889) that was voted/accepted on Ballot 2 of SBVR 1.4 and it should be closed/deleted from the system. See attached copy of the submission of 19889 at the end of this email.

### **Issue: Stand-Alone 'Must' in a Necessity**

The second Necessity for "adopted definition" on p.137 includes a stand-alone "must". Use of a stand-alone "must", with its inherent sense of obligation, in Necessities is inappropriate. (In reviewing the whole document, this is the only case I find of its use in a Necessity.)

Resolution

Change:

Necessity: Each adopted definition must *be of* a concept *in* the body of shared meanings that *unites* the semantic community that *has* the speech community.

to

Necessity: Each adopted definition *is of* a concept *in* the body of shared meanings that *unites* the semantic community that *has* the speech community.
